Subject Index

Volume 23, 1990

Page numbers followed by (Abs) denote abstracts from Sixteenth International Congress on Electrocardiology.

Accessory pathway in Wolff-Parkinson-White syndrome
determination by inverse solution (Abs), 284
Action potentials
slow-response and berberine effect, 231
Acute myocardial infarction. *See also* Myocardial infarction
body surface mapping
epicardial activity inferred from (Abs), 282
in prediction (Abs), 275
concommitant anterior/inferior ST elevation in, 199
giant negative T wave significance in (Abs), 281
Acutely ischemic myocardium
quantification post-myocardial infarction, 9
Aging
anatomic and functional basis of atrial fibrillation in very old (Abs), 283
predictive value of Sokolow-Lyon index in the very old (Abs), 281
significance of cardiac rhythm disturbances, 171
Ambulatory monitoring
real-time detection by Oxford Medilog 4500, 301
Angina
alternating Wolff-Parkinson-White syndrome in, 255
Angiography-based criteria
for VCG diagnosis of high lateral myocardial infarction (Abs), 275
Angioplasty
percutaneous transluminal coronary, twelve-lead monitoring in, 192
Anterior/inferior concommitant ST elevation
in acute myocardial infarction, 199
Anterolateral negative T waves and left ventricular geography (Abs), 279
Antiarrhythmic drugs
Class Ia effect on fasciculoventricular fibers, 323
Apical hypertrophic cardiomyopathy
Simulation study of giant negative T waves (Abs), 277
Arrhythmias
clinical detection by Holter real-time system (Oxford Medilog 4500), 301
social stress and risk in rats (Abs), 283
successive RR plotting in analysis, 243
Asynergic site localization
by body surface mapping in previous myocardial infarction, 13
Atrial cells
hypoxia effect on electrical activity in rabbit, 69
Atrial fibrillation
anatomic and functional basis in the very old (Abs), 283
Atrial membrane potentials
calcium modulators and ethanol in rat, 157
Atrioventricular block
complete with variable-amplitude QRS complexes, 365
Atrioventricular node
hypoxic effects in cellular electrical activity in rabbit, 69

Berberine
effect on slow-response action potentials, 231
Bigeminy
ventricular parasystolic with reentrant ventricular extrasystoles, 177
Biomagnetic source localization (Abs), 278
Body surface mapping
absolute extrema in children (Abs), 281
in assessment of acute myocardial infarction (Abs), 275
electrogenesis of S1S2S3 pattern, 23
evaluation of regional cardiac excitation by Karhunen-Loeve expansion, 33
infarction pattern and low voltage reversal after renal dialysis for pulmonary edema, 341

Body surface mapping (*Continued*)
inferred epicardial activity in acute MI (Abs), 282
in left ventricular hypertrophy during PQRST (Abs), 281
in Wolff-Parkinson-White syndrome
correlation with EPs and surgical mapping (Abs), 280
localization of asynergic site in previous myocardial infarction, 13
QRS offset/onset detection, 293
QRST interval subdivision (Abs), 276
Book reviews
Comprehensive Electrocardiology: Theory and Practice in Health and Disease (Macfarlane and Lawrie, eds), 188
Practical Electrocardiology, ed. 8 (Marriott), 187
Bradycardia-tachycardia syndrome
carbamazepine-induced, 85

Calcium modulators
in rat atrial membrane potentials, 157
Carbamazepine-induced bradycardia-tachycardia syndrome, 85
Cardiac anisotrophy
effects on spatial distribution of ventricular recovery potentials in isolated dog hearts (Abs), 277
Cardiac arrest. *See* Sudden cardiac death
Cardiac catherization
usefulness of routine ECG after, 359
Cardiac excitation
evaluation of regional by Karhunen-Loeve expansion in body surface mapping, 33
Cardiac extracellular waveforms
simulation and experimental studies influencing frequency spectrum, 109
Cardiac rhythm disturbances
frequency and significance in elderly individuals, 171
Cardiomyopathy
hypertrophic presenting features and prognosis, 213
hypertrophic apical simulation study of giant negative T waves (Abs), 277
idiopathic vector U loops in, 331
Children
body surface mapping absolute extrema (Abs), 281
Chronotropic regulation
heart rate vs. heart rate variability (Abs), 280
Class Ia antiarrhythmic drug fasciculoventricular fiber effects, 323
Computer simulation
localization of intracardiac biomagnetic sources (Abs), 278
Wolff-Parkinson-White syndrome, 261
Computer-assisted interpretation of exercise ECG, 285
Computerized precordial mapping vs. thallium SPECT in diagnosis of myocardial ischemia (Abs), 276
Conduction delay
right ventricular in hyperacute RV infarction/ischemia, ECG marker for, 369

Depolarization
early abnormalities in remote anterior MI, 307
Digital interpretation
off-line of exercise ECG, 285
Dilative cardiomyopathy
markers of impaired LV function (Abs), 277
Dipole localization
torso potential approximation from limited lead system (Abs), 283

Echocardiography
two-dimensional esophageal atrial pacing (Abs), 277
Ectopic ventricular beats
localization from intracavitary potential distributions (Abs), 279
Elderly individuals. *See* Aging
Electrocardiographic criteria
R wave in posterolateral myocardial infarction vs. normal anterior forces, 147
Electrocardiography
routine after cardiac catherization, 359
twelve-lead during percutaneous transluminal coronary angioplasty, 192
Electrogenesis
S1S2S3 pattern, 23
Epicardial activity
body surface mapping in acute MI (Abs), 282
Equivalent dipole determination (Abs), 279
Esophageal atrial pacing in coronary patients (Abs), 277
Ethanol
in rat atrial membrane potentials, 157
Excitation wavefronts
intramural spread (Abs), 282
Exercise
ventricular hypertrophy, 41
Exercise electrocardiogram
digital off-line interpretation, 285
performance of hypertensives related to criteria for left ventricular hypertrophy, 41
Exercise-induced myocardial ischemia
thallium SPECT vs. computerized precordial mapping (Abs), 276
Exit block
in parasystolic ventricular tachycardia, 89
Extracellular waveforms
simulation and experimental studies of factors influencing frequency spectrum, 109
Extrasystoles
reentrant ventricular with ventricular parasystolic bigeminy, 177
ventricular, theoretical model, 249

Fasciculoventricular fiber effects
of class Ia antiarrthythmics, 323
Fast Fourier transformation
of late potentials in prediction of ventricular tachycardia (Abs), 275

Frequency spectrum of cardiac extracellular waveforms
factors influencing, 109

Guinea pig
overdrive suppression in sinoatrial node, 53

Heart failure
procainamide initiation of ventricular tachycardia during programmed stimulation, 77
Heart rate vs. heart rate variability in chromnotropic regulation (Abs), 280
His bundle ablation
clinical experience with new catheter, 165
Holter monitoring
real-time in clinical arrhythmia detection (Oxford Medilog 4500), 301
Hypercalcemia/hypermagnesemia
electrocardiographic manifestations, 235
Hypertension
exercise performance related to criteria for left ventricular hypertrophy, 41
Hypertrophic cardiomyopathy
presenting features and prognosis, 213
simulation study of giant negative T waves (Abs), 277
Hypoxia
effect on atrioventricular nodal and atrial cell electrical activity in rabbit, 69

Idiopathic cardiomyopathy
vector U loops in, 331
Idiopathic dilative cardiomyopathy
markers of impaired LV function (Abs), 277
Infarction pattern and low voltage reversal after renal dialysis, 341
Inferior myocardial infarction
ST-segment elevation in leads V_1–V_3 and V_{3R}–V_{4R} (Abs), 276
synthesized vector cardiography in diagnosis, 207
Intermittent ventricular parasystolic bigeminy with reentrant ventricular extrasystoles, 177
Interventricular septal ischemia
VCG and dipolar ECG in (Abs), 278
Intramural spread of excitation wavefronts (Abs), 282
Intraventricular conduction delay
QT interval and repolarization time, 49
Inverse solution
accessory pathway determination in Wolff-Parkinson-White syndrome (Abs), 284
stability and correctness (Abs), 282
Ischemia. *See also* Acute myocardial infarction; Myocardial infarction
hyperacute right ventricular, marker for conduction delay, 369
interventricular septal
VCG and dipolar ECG in (Abs), 278
quantification of acute post-myocardial infarction, 9
ventricular fibrillation during reperfusion in dogs, 347
Ischemic heart disease. *See also* Myocardial infarction
ECG and magnetocardiographic complementarity, 315
Isointegral maps
QRS and QRST compared (Abs), 278

Karhunen-Loeve expansion
in evaluating regional cardiac excitation in body surface maps, 33

Late potentials
fast Fourier transformation in prediction of ventricular tachycardia (Abs), 275
spectrotemporal analysis of ventricular, 95
Left ventricular ejection fraction
with healed myocardial infarction
multiple regression analysis of Minnesota Q-QS ECG codes, 1
Left ventricular function
markers of impaired in idiopathic dilative cardiomyopathy (Abs), 277
Left ventricular geography
anterolateral negative T waves and (Abs), 279
Left ventricular hypertrophy
criteria related to exercise performance in hypertensives, 41
PQRST body surface mapping (Abs), 281
social stress and arrhythmia vulnerability in rats (Abs), 283
Limited lead system
torso potential approximation from dipole localization (Abs), 283
Long QT syndrome
dishomogeneity of ventricular repolarization (Abs), 283
Longitudinal dissociation in reentrant path of ventricular extrasystoles, 249
Low voltage and infarction pattern reversal after renal dialysis, 341

Magnetocardiography
ECG complementarity in ischemic heart disease, 315
Membrane potentials
calcium modulators and ethanol in rat, 157
Multiple regression analysis
Q-QS codes in LV ejection fraction in healed myocardial infarction, 1
Myocardial infarction
acute. *See* Acute myocardial infarction
asynergic site localization by body surface mapping, 13
concommitant anterior/inferior ST elevation in acute, 199
experimental

Myocardial infarction (*Continued*)
in pigs, 137
seasonal variation in sudden cardiac death, 223
giant negative T wave significance in acute (Abs), 281
healed
Q-QS code multiple regression analysis, 1
quantification of healed and acutely ischemic myocardium, 9
high lateral vector cardiographic diagnosis (Abs), 275
hyperacute right ventricular, marker for conduction delay, 369
inferior
ST-segment elevation in leads V1–V3 and V3R–V4R (Abs), 276
synthesized vector cardiography in diagnosis, 207
posterolateral vs. normal prominent anterior forces
tail R waves in right precordial leads, 147
remote anterior early depolarization abnormalities, 307
Myocardial ischemia. *See* Ischemia; Myocardial infarction

Overdrive suppression
in guinea pig sinoatrial node, 53
Oxford Medilog 4500 in real-time clinical arrhythmia detection, 301

Parasystolic ventricular bigeminy
with reentrant ventricular extrasystoles, 177
Parasystolic ventricular tachycardia
with exit block, 89
Percutaneous transluminal coronary angioplasty
twelve-lead electrocardiography in, 192
Posterolateral myocardial infarction vs. normal prominent anterior forces, 147
PQRST
body surface mapping in left ventricular hypertrophy (Abs), 281
Procainamide
ventricular tachycardia initiation during programmed stimulation in heart failure, 77
Pulmonary edema
reversal of low voltage and infarction pattern after renal dialysis, 341

Q-QS codes
multiple regression analysis in healed myocardial infarction, 1
QRS and QRST isointegral maps compared (Abs), 278
QRS complexes
complete atrioventricular block with, 365
QRS interval
offset/onset detection in body surface mapping, 293
significance in very old people: predictive value of Sokolow-Lyon index (Abs), 281
QRST complexes
integral mapping in risk prediction for ventricular arrhythmias (Abs), 280
subdivision in body surface mapping (Abs), 276
QT interval
and repolarization time in intraventricular conduction delay, 49
Quantification
of healed and acutely ischemic myocardium, 9

R waves
in distinguishing posterolateral myocardial infarction from normal prominent anterior forces, 147
Reentrant ventricular extrasystoles
with ventricular parasystolic bigeminy, 177
Regional cardiac excitation
evaluation by Karhunen-Loeve expansion in body surface mapping, 33
Renal hemodialysis
reversal of low voltage and infarction pattern after, 341
Reperfusion
ventricular fibrillation during in dogs, 347
Repolarization time
and QT interval in intraventricular conduction delay, 49
Resting potential
stretch-induced alteration in mammalian heart (Abs), 278
Rhythm disturbances
frequency and significance in elderly individuals, 171
Right ventricular conduction delay
in hyperacute RV infarction or ischemia: ECG marker for, 369
Right ventricular endocardial mapping
electrogenesis of S1S2S3 pattern, 23
Right ventricular infarction/ischemia
conduction delay ECG marker, 369
RR plotting
successive in arrhythmia analysis, 243

S1S2S3 pattern
electrogenesis, 23
Sinoatrial node
overdrive suppression in guinea pig, 53
Slow-response action potentials
berberine in, 231
Social stress
and arrhythmia vulnerability in rats with LVH (Abs), 283
Sokolow-Lyon index
predictive value in very old people (Abs), 281
Spectrotemporal analysis
ventricular late potentials, 95
ST elevation
concommitant anterior/inferior in acute myocardial infarction, 199
leads V_1–V_3 and V_{3R}–V_{4R} in inferior myocardial infarction (Abs), 276

Stretch-induced alteration in resting potential (Abs), 278
Sudden cardiac death
seasonal variation after experimental myocardial infarction, 223
Supraventricular tachycardia
with Wolff-Parkinson-White syndrome
computer simulation, 261
Synthesized vector cardiography
in diagnosis of inferior myocardial infarction, 207

T waves
anterolateral negative and left ventricular geography (Abs), 279
giant negative
in hypertrophic apical cardiomyopathy (Abs), 277
in myocardial infarction (Abs), 281
Tachycardia
parasystolic ventricular with exit block, 89
supraventricular with Wolff-Parkinson-White syndrome
computer simulation, 261
ventricular. *See* Ventricular tachcardia
Tall R waves
in distinguishing posterolateral myocardial infarction from normal prominent anterior forces, 147
Thallium SPECT vs. computerized precordial mapping
in induced myocardial ischemia (Abs), 276
Torso potential approximation
by dipole localization from limited lead system (Abs), 283
Twelve-lead electrocardiography
during percutaneous transluminal coronary angioplasty, 192

U loop VCG in idiopathic cardiomyopathy, 331

Vector cardiography
high lateral myocardial infarction; angiography-based criteria (Abs), 275
in interventricular septal ischemia (Abs), 278
R wave in posterolateral myocardial infarction vs. normal anterior forces, 147
synthesized in diagnosis of inferior myocardial infarction, 207
U loops in idiopathic cardiomyopathy, 331
Ventricular arrhythmias
QRST integral mapping in risk prediction (Abs), 280
Ventricular ectopic beats
localization from intracavitary potential distributions (Abs), 279
Ventricular extrasystoles
with fixed coupling, theoretical model, 249
Ventricular fibrillation
during partial reperfusion after severe ischemia in canine model, 347
Ventricular late potentials
spectrotemporal analysis, 95
Ventricular parasystolic bigeminy
with reentrant ventricular extrasystoles, 177
Ventricular recovery potentials
cardiac anisotrophy and spatial distribution in isolated dog hearts (Abs), 277
Ventricular repolarization
dishomogeneity detection in long QT syndrome (Abs), 283
Ventricular septal hyperperfusion
in remote anterior MI with early depolarization abnormalities, 307
Ventricular tachycardia
fast Fourier transformation of late potentials in prediction (Abs), 275
parasystolic with exit block, 89
procainamide initiation during programmed stimulation in heart failure, 77

Waveforms
cardiac extracellular, factors influencing frequency spectrum, 109
Wolff-Parkinson-White syndrome
accessory pathway determination by inverse solution (Abs), 284
alternating in angina, 255
body surface mapping correlation with EP and surgical mapping (Abs), 280
computer three-dimensional simulation, 261
